

Installation & Commissioning Service

Now more than ever the industry is experiencing gaps in qualified instrumentation, electrical and analyzer (I/E/A) expertise. Companies who need to recruit quickly rely solely on I/E/A service providers to answer:

- How will you staff, retain and manage qualified personnel to complete projects safely?
- Are your I/E capabilities aligned properly with planning and budgeting to meet revenue targets?
- Could your operation benefit from system and operation training designed to boost productiv-

With over 6-year-experience recruiting I/E/A support, Blue Stacks staff projects from front-end development through installation, checkout, commissioning, start-up, operational phases and post-operational maintenance, offering facilities a single-point of contact.

Improving the efficiency of I/E operations is part of Blue Stacks's philosophy. From a single technician for a short assignment to a team of engineers, technicians and craft workers for grassroots projects, we respond with support services that match your process control needs.

- Small capital projects

Installation & Commissioning Service

Unlike employees of some smaller contractors, our personnel are seasoned, career-driven individuals attracted by Blue Stacks' comprehensive benefits package. And as a system of Blue Stacks, we can pull through specialized support services and equipment from one of the largest industrial service groups in the world. Whether recruiting top candidates using our resources, third parties or from a database of over 100 I/E/A craft, technical and managerial talent searchable by discipline, we hand-pick the right team for you.
