

Repairing & Troubleshooting Service

ANT Engineering Plus offers both on-site and send-in repair service that restores your product to its designed operational condition. On-site repairs include board replacements and system-level component changes. Having repair performed at your site gets your equipments back to work in the shortest time possible.

Our centralized coordination of field based service specialists provide prompt on site repair and troubleshooting of all instrumentation analyzer products. We also provide service contracts available for customers requiring specific response times for crucial processes and plant.

Type of Equipment we serve :

- Gas & Liquid Analyzer
- Gas Chromatograph
- CEM Analyzer
- Gas Detection System
- Fire Alarm System
- Field Instrumentation Equipment

We cover all made and model:
